

Search, find the all medical services around
you to get your most desirable health care .

project : I-Care

Under supervision of:

- Prof.Dr Khalid M. Hosny
- Dr.Muhammed Abdelbaset Metwally

Prepared by:

- Muhammad Ali Abdelhamid Arafah

Agenda

- Introduction
- Why I-Care?
- Snapchats of the system.

- Booking an appointment with the doctor of your choice using your smartphone is a common thing in the developed parts of the world.
- We usually contact the receptionist at the hospital to book an appointment with a doctor but there is no way to review or research the doctor before making an appointment.
- Through this app we can easily book our appointments and read about the doctors profiles and reviews.

- It has just 3 simple steps as **Search for a Doctor, Pick an Appointment , Verify Appointment** . It is a mobile app , so patients can book appointments from anywhere.
- We help patients to book appointment with doctors instantly, be it in your location or any other location.
- We developed I-Care to help doctors start the business features with minimum cost, because the hospital industry is a growing business.
- Our Doctor Booking app has more features with doctor login and complete system manage by admin.

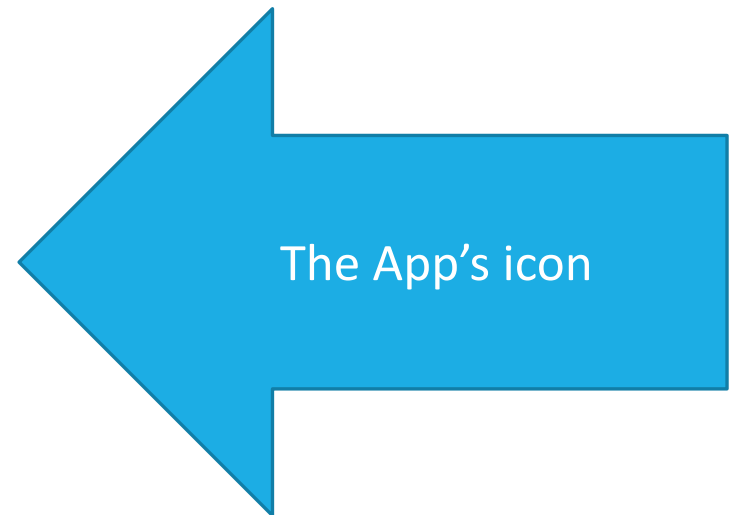

Agenda

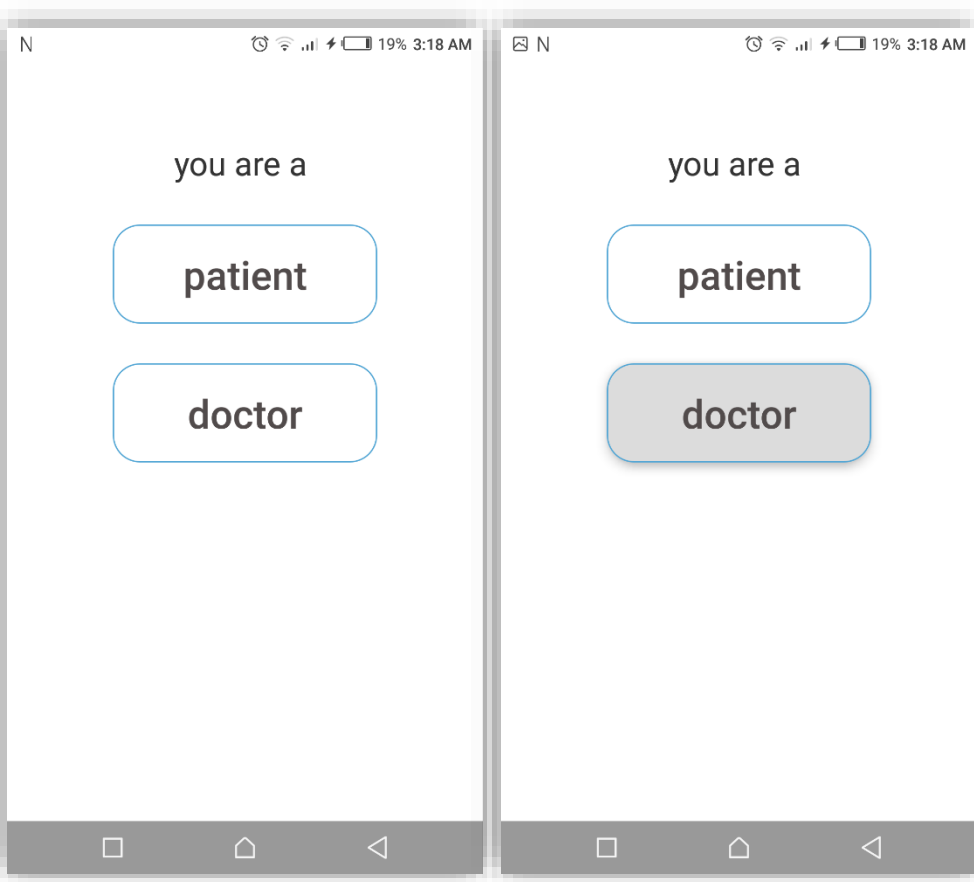

- Introduction
- Why I-Care?
- Snapchats of the system.

- I-care has the following features:
 - Doctor search by Specialty , City and sorting results based on your current location using your latitude & longitude.
 - Providing information about doctors represented in a profile for each doctor user available in the system.
 - Booking appointments for patients at their convenience.
 - Built as a mobile app, so patients can book appointments from their mobile any where at any time.

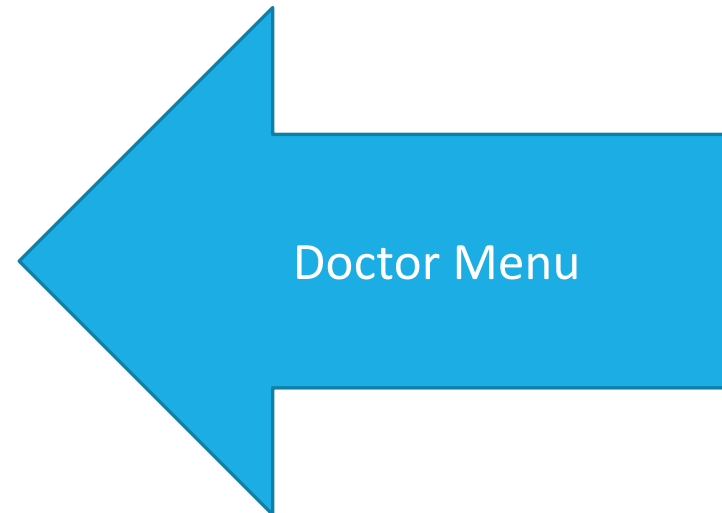

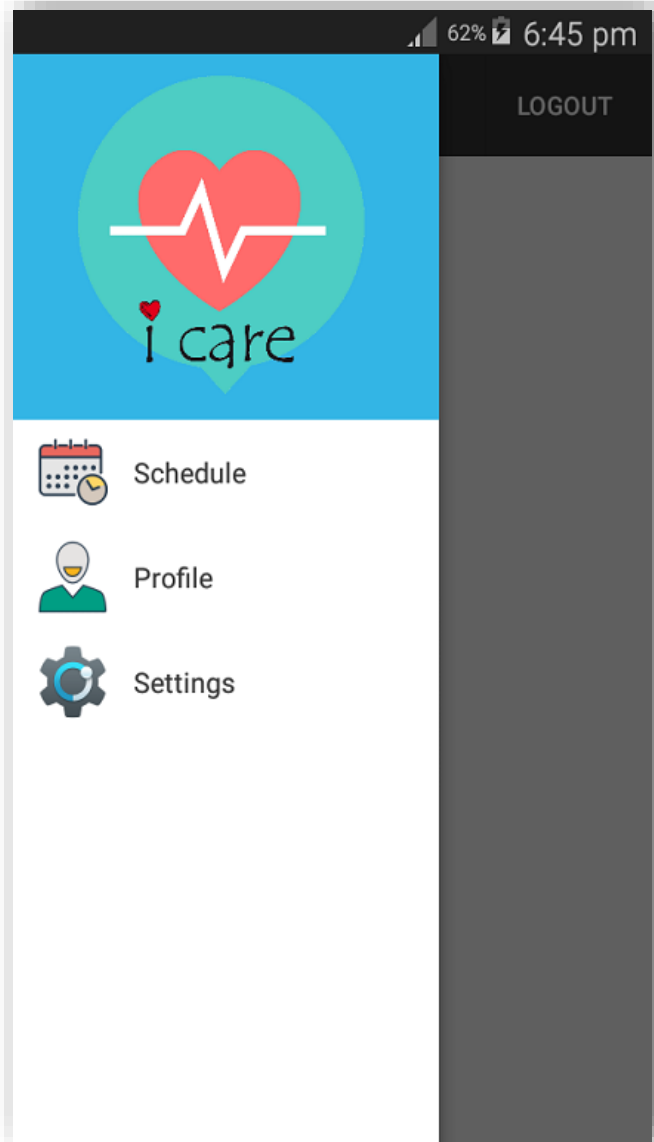

Agenda

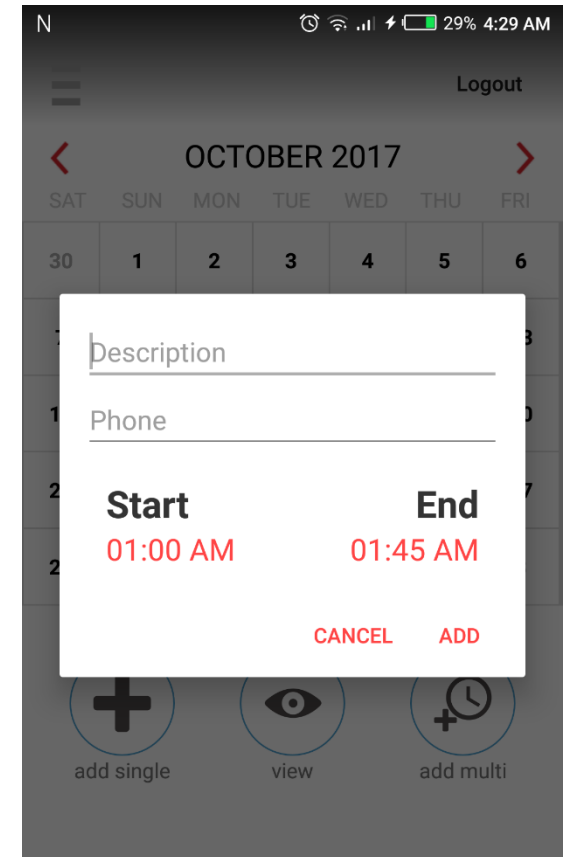

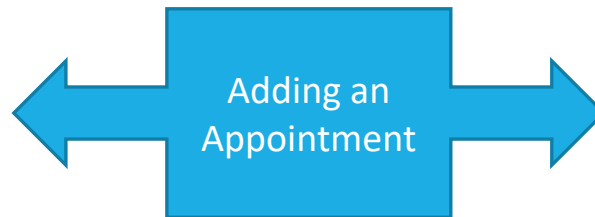

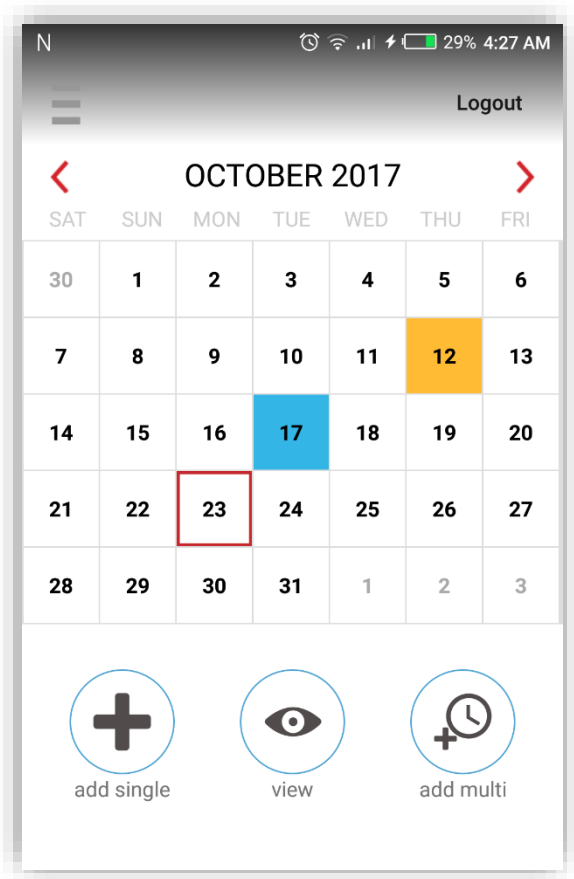

- Introduction
- Why I-Care?
- Snapshots of the system.
